California Health & Human Services Agency
Center for Data Insights and Innovation
Data Exchange Framework Technical Advisory Subcommittee (TASC) Meeting
Chat Log (1:00 PM – 2:00 PM PT, September 4, 2024)

The following comments were made in the Zoom chat log by Members of the TASC and staff during the September 4, 2024, meeting:

13:03:46 From Hans Buitendijk to Hosts and panelists:
Just joined.

13:18:35 From Hans Buitendijk to Everyone:
Authorization engines could handle it, but the question is to configure them with agreed to rules. And as indicated early work.

13:27:29 From Rim Cothren to Hosts and panelists:
Thanks, Catalina. Can Lisa and Ray please copy their comments again to Everyone?

13:27:38 From Raymonde Uy to Everyone:
It's so much easier to just share (or protect) the whole document than to go through a tagging and redacting service

13:28:46 From Raymonde Uy to Everyone:
Is HTI-2 -> TEFCA and QHINs the solution?

13:29:52 From Hans Buitendijk to Everyone:
Agreed that contained data when not encoded/quantified is an additional hurdle. When the documentation is created is an optimum time to assess whether it contains sensitive data at that time and flag accordingly. But if the definition of what is sensitive changes, those documents/data sets need to be re-flagged. Perhaps not a day one requirement, but a piece of the puzzle to address.

13:32:12 From Raymonde Uy to Everyone:
@Hans, agreed. All the statutes need more specificity in the concept definitions, with referenced value set OIDs hosted on a public repository like VSAC or PHINVADS

13:32:38 From Hans Buitendijk to Everyone:
Who can state that "this is the sensitive data set, and what are the sensitivity flags"?

13:35:36 From John Helvey to Everyone:
Hans said very eloquently exactly what I was going to say

13:37:20 From John Helvey to Everyone:
Big Question is who at the state is going to put their stamp of approval on this beginning point and evolution there of?

13:38:22 From John Helvey to Everyone:
Minor consent is a huge issue in California given it starts at the age of 12.

13:43:05 From Raymonde Uy to Everyone:

I'm hoping ASTP/ONC can vet these materials

13:53:48 From Hans Buitendijk to Everyone:
The challenge is that jurisdictions need to agree that we are using the correct value sets for sensitive data and sensitivity flags, while there is some level of confirmation what the acceptable computable rules are.

13:54:18 From John Helvey to Everyone:
👍

13:57:19 From Raymonde Uy, MD, MBA, ACHIP to Everyone:
The Illusion of Health Privacy in Obstetrics-Gynecology (Clinical Obstetrics and Gynecology, Forthcoming 2023), Mark A Rothstein, JD
